AI Workshop — Full Session Flow

~1.5–2 hours total

1 Intro + AI Basics — 15 min

- What is AI? · AI vs ML vs Deep Learning vs Generative AI
- Why AI exploded after 2022 · AI in daily life · Evolution of AI

2 Modern AI + Tools — 20 min

- Tokens · Training data · Neural networks · LLMs · Fine-tuning · Agents · RAG
- Tools: ChatGPT · Claude · Perplexity · Gemini · GitHub Copilot · Cursor · Colab
- How AI reads vs how humans read · Model sizes and trade-offs

3 Live Demonstration ★ Most impactful — 30 min

- Build a quick e-commerce website using Kiro (no coding required)
- Show AI writing, image generation, and code generation live
- Students remember demos more than theory — make this interactive!

4 AI Careers + Entrepreneurship — 20 min

- Careers: Data Scientist · ML Eng · AI Engineer · Prompt Eng · AI PM · Researcher
- Startups: Solve local problems · Freelancing · SaaS · Hackathons · Nepal ideas
- Freelance platforms using AI: Upwork, Fiverr · Building an AI portfolio

5 Writing Effective Prompts — 20 min

- What makes a good prompt: context · role · task · format · tone
- Zero-shot vs few-shot vs chain-of-thought prompting
- Common mistakes: vague instructions · no examples · missing constraints
- Prompt templates for study, work, coding, and creative writing
- Live prompt battle: students compete to get the best AI response!

6 Q&A + Student Action Plan — 15 min

- Roadmap: Prompting → Python → APIs → Projects → Hackathons → GitHub portfolio
- Resources: YouTube channels · Free courses · Communities · Kaggle datasets
- 30-day challenge: build one AI project and share it online

Optional Bonus Sections

Myth Busting

'AI replaces all jobs' · 'Need a PhD' · 'Only for coders'

Interactive Activities

AI quiz · Prompt battle · Mini hackathon · Meme generation

Total Duration: 1.5 – 2 hours
